2m × 1m PVC banner template · 2000 × 1000mm

Finished size 2000 × 1000mm.

Set your page to 2010 × 1010mm, which includes 5mm bleed on every edge. This template is 1:10 scale (201 × 101mm), and you can design at this scale or at full size.

Pink area: bleed. Run your background right to the page edge; it is trimmed off.

Black line: the finished edge. Blue dashed line: keep words and logos inside it (60mm in, clear of the hems and eyelets).

Grey circles: where the eyelets go (26mm in from the edge, about every metre).

Photos: 100 dpi at full size (that is 1,000 dpi at this 1:10 scale). A PDF in CMYK is best, with fonts outlined.
